Note: Android Studio 3.4 and higher provide compiled versions of your resources by default. Local unit tests. Use the AndroidX Test APIs whenever possible so that your unit tests can run on a device or emulator. For tests that always run on a JVM-powered development machine, you can use Robolectric.

Fundamentals of Testing | Android Developers

It's possible that users can already navigate your app using a keyboard, because the Android system enables most of the necessary behaviors by default. All interactive widgets provided by the Android framework (such as Button and EditText) are focusable. This means users can navigate with control devices such as a D-pad or keyboard and each ...
