As illustrated in the graph above, the point at which total fixed and variable costs are equal to total revenues is known as the break even point. At the break even point, a business does not make a profit or loss. Therefore, the break even point is often referred to as the “ no-profit ” or “ no-loss point. ” The break even analysis is important to business owners and managers in determining how many units (or revenues) are needed to cover fixed and variable expenses of the business.

~~Break Even Analysis - Learn How to Calculate the Break ...~~

Break-even point (BEP) is a term in accounting that refers to the situation where a company ' s revenues and expenses were equal within a specific accounting period Fiscal Year (FY) A fiscal year (FY) is a 12 month or 52 week period of time used by governments and businesses for accounting purposes to formulate annual financial reports. A Fiscal Year (FY) does not necessarily follow the calendar year.

asset price, or a firm's revenues, can fall and still stay above the break-even point.

~~Break-Even Analysis Definition — investopedia.com~~

In order to calculate your company's breakeven point, use the following formula: $\text{Fixed Costs} \div (\text{Price} - \text{Variable Costs}) = \text{Breakeven Point in Units}$. In other words, the breakeven point is equal to the total fixed costs divided by the difference between the unit price and variable costs.
