Hart, C / VOCAB 18 - Coastal & Continental Temperature Ranges

Continental climates often have a significant annual variation in temperature (hot summers and cold winters). They tend to occur in the middle latitudes (40 to 55 north), where prevailing winds blow overland, and temperatures are not moderated by bodies of water such as oceans or seas. Continental climates occur mostly in the Northern Hemisphere, which has the kind of large landmasses on ...

Continental climate - Wikipedia

Question: How does the annual temperature range for a coastal city compare to the annual temperature range for a continental city? 6. Question: Using the climographs and the temperature ranges you calculated, how does the rate of heating and cooling for a coastal city compare to the rate of heating and cooling for a continental city? 7.

Name Coastal and - earth science webpage

The coastal Mediterranean region of Costa Brava, Catalonia, Spain. A Mediterranean climate / m d t r e n i n / or dry summer climate is characterized by dry summers and mild, wet winters. The climate receives its name from the Mediterranean Basin, where this climate type is most common. Mediterranean climate zones are typically located along the western sides of continents ...

Mediterranean climate - Wikipedia

Coastal regions have a smaller range in temperature than continental interiors because their temperature is determined by the the temperature of sea water. Coastal regions have salty water therefore, water remains cool and when the cool breezes from water reaches the coastal regions, they become cool as well.
