One of the most powerful laws in physics is the law of momentum

conservation. The law of momentum conservation can be stated as

follows. For a collision occurring between object 1 and object 2 in

an isolated system, the total momentum of the two objects before

the collision is equal to the total momentum of the two objects after

the collision. That is, the momentum lost by object 1 is equal to ...

Conservation theorems about corresponding quantities also exist in quantum mechanics. The most beautiful thing of quantum mechanics is that the conservation theorems can, in a sense, be derived from something else, whereas in classical mechanics they are practically the starting points of the laws. ...
