Calculus, originally called infinitesimal calculus or "the calculus of infinitesimals", is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus and integral calculus; the former concerns

Formal definition. Let X be a locally compact Hausdorff space,
and let \mathcal{O} be the smallest σ -algebra that contains the open
sets of X ; this is known as the σ -algebra of Borel sets. A Borel
measure is any measure defined on the σ -algebra of Borel
