The DTR-8.9 is a dual push-pull design, rated by Integra at 140 watts of continuous power across the entire spectrum (20 Hz-20 kHz) into two channels, at 8 ohm loads, with THD at 0.05% (FTC). The DTR-8.9, like most Integra and Onkyo products, uses WRAT (Wide Range Amplifier Technology), which provides bandwidth from 5 Hz to 100 kHz (although built-in limiters prevent significant output at those extreme frequencies to avoid speaker damage).

Next-generation audio/video controller. Integra raised a lot of eyebrows when it announced the new DTC-9.8 A/V processor at CEDIA last year. Not only was this the first pre/pro on the market to offer decoding of the next-gen audio codecs from Dolby and DTS, it also boasts Silicon Optix video processing and highly sophisticated Audyssey room correction.

The world's premier home theater equipment for Crafted Entertainment Integra provides the highest performance and advanced technical features available to maximize the home theater and integration experience. Learn How An Unmatched Lineup

Integra Home Theater - Integra Home Theater

The DTR 7.8 uses Burr-Brown's top of the line 192kHz/24bit DACs in all channels, and as usual the Integra puts out neutral, uncolored music. So, I spent most of my time listening to hi-res music through the Oppo's HDMI connection, allowing the player to output a raw bitstream to the Integra and letting the DTR 7.8 do all the heavy lifting of decoding and processing the signal.

Integra DTR-9.1 A/V receiver. Integra's DTR-9.1 A/V receiver has a sound battle plan, thanks to its potent mix of high-end tricks and approachability. In case you hadn't noticed over the last year, the high-end-receiver war is on. With this donnybrook comes a blurring of the formerly distinct line between the bottom end of the separates market and the high end of the receiver market.
