----- BASIC MATRIX MANIPULATIONS Introduction You are familiar with the methodology pertaining to the least squares fitting of the simple linear regression model $Y = \beta_0 + \beta_1 X + e$. You are also aware of the fact that a more common and more general problem is that of relating a response not to just one but to several independent variables.

Introduction This part will start you thinking about designing and analyzing algorithms. It is intended to be a gentle introduction to how we specify algorithms, some of the design strategies we will use throughout this book, and many of the fundamental ideas used in algorithm analysis. Later parts of this book will build upon this base.
