Then there's the type of pork production you want to start. The choice between farrow-to-finish, farrow-to-feeder, and feeder-to-finish very much depends on social and environmental implications, level of management and marketing skill required, and amount of capital, labor, and land you have available.

~~Pig Production and Management | Penn State Extension~~

Livestock farming - Livestock farming - Production systems: Pork production can lend itself to mechanization and reduced use of high-priced labour. Self-feeders, diets composed of grains and oilseed by-products, and construction of slotted floors and outside tanks or lagoons for manure storage have become almost universal among large-scale commercial producers in developed countries.

~~Livestock farming - Production systems | Britannica~~

Growing populations, rising affluence and urbanization are translating into increased demand for livestock products, particularly in developing countries. Global demand is projected to increase by 70 percent to feed a population estimated to reach 9.6 billion by 2050. Much of the growth in demand is being supplied through rapidly expanding modern forms of intensive livestock production, but ...
