Therefore, symptoms of pulpitis and pulpal diagnosis need to be considered carefully and followed by appropriate intervention. Indirect pulp treatment (IPT) or coronal pulpotomy could be excellent less invasive alternative treatments that allow uninflamed pulp tissue to remain in place to regenerate and heal (Asgary et al. 2014, Taha et al. 2017

Minimally invasive endodontics: a new diagnostic system ...

Minimally Invasive Techniques Unit UTEMI, Minimally Invasive Techniques Unit for Pain Treatment offers wide choice of techniques based in interventionist radiology . Medical technology advances combined with the best imaging guide (MRI, CT, X-ray), we offer an alternative to surgical treatment that allows us to treat different pathologies safely, with less pain and reduced recovery time.

Minimally Invasive Techniques Unit for Pain Treatment at ...

Ablation allows the doctor to destroy the tumor (s) in a minimally-invasive way — using few or very small incisions. Ultrasound, CT or MRI images allow the doctor to see the liver in real time while performing the ablation procedure. Guided by images of the liver, the doctor places the ablation antenna into the center of the tumor.
