High Efficiency Video Coding (HEVC), also known as H.265 and MPEG-H Part 2, is a video compression standard designed as part of the MPEG-H project as a successor to the widely used Advanced Video Coding (AVC, H.264, or MPEG-4 Part 10). In comparison to AVC, HEVC offers from 25% to 50% better data compression at the same level of video quality, or substantially improved video quality at the ...

Showstopper! is a vivid account of the creation of Microsoft Windows NT, perhaps the most complex software project ever undertaken. It is also a portrait of David Cutler, NT's brilliant and, at times, brutally aggressive chief architect. Cutler surely ranks as one of the most impressive software engineers the field has ever produced.
