Highway installation was the initial application for geo-composite pipe and today remains a primary market. State transportation authorities have conducted a growing number of field studies, all of which indicate that properly designed and installed edge drains are a major factor in extending pavement life and reducing maintenance costs.

Therefore since 1.149 < 1.0, take reduction factor as 1.0. The effective width is therefore c eff = cp = 1.0 x 14.25 = 14.25mm. The effective area of the edge stiffener; A s = t(b e2 + c eff) = 1.45 (23.4255 + 14.25) = 54.629 mm 2. We now have to use the initial effective cross-section of the stiffener to determine the reduction factor, allowing for the effects of the continuous spring...

Overview of Bridges. There are more than 617,000 bridges across the United States. Currently, 42% of all bridges are at least 50 years old, and 46,154, or 7.5% of the nation ' s bridges, are considered structurally deficient, meaning they are in " poor " condition. Unfortunately, 178 million trips are taken across these structurally deficient bridges every day.
