A hydrostatic test is a way in which pressure vessels such as pipelines, plumbing, gas cylinders, boilers and fuel tanks can be tested for strength and leaks. The test involves filling the vessel or pipe system with a liquid, usually water, which may be dyed to aid in visual leak detection, and pressurization of the vessel to the specified test pressure.

I am a PADI professional diving instructor (have been diving for more than 10 years and logged 5,000+ dives). For example you say, that plan your dive and decompression sickness won't happen. You neglect to mention that it can happen even if the dive is planned and adhered to. In cases where the diver is dehydrated, ill, cold, overweight, etc.
