Eliminativism and falsification.

Eliminativism. and falsification.

Subjective Bayesianism is currently the most popular view of the confirmation of scientific hypotheses, partly because it seems to accord with important features of confirmation and partly because it is both systematic and precise. But the worry just outlined is not the only concern that critics press and defenders endeavour to meet.

website, we present a rough synthesis of some new and some old ideas from the philosophy of science.

The philosophy of science
The demarcation problem refers to the distinction between science and nonscience (including pseudoscience); Karl Popper called this the central question in the philosophy of science. [] However, no unified account of the problem has won acceptance among philosophers, and some regard the problem as unsolvable or uninteresting.
