To err is human - Idioms by The Free Dictionary It is through the human body's respiratory system that the cells of the human body receive the oxygen that they need to properly function. The entry 'gates' of the respiratory system are the mouth and nose. This is where air comes into the human body, and this air is then directed toward and down the trachea into the lungs. The diaphragm is a muscle located across the bottom of the chest that makes the body draw in air through the nose and mouth and then exhale air through the same orifices.
