Introduction to Rule-based
Applications

Download File PDF Using Rule Based Design In

In computer science, a rule-based system is used to store and manipulate knowledge to interpret information in a useful way. It is often used in artificial intelligence applications and research.

Normally, the term rule-based system is applied to systems

Download File PDF Using Rule Based Design In involving human-crafted or curated rule sets. Rule-based systems constructed using automatic rule inference, such as rule-based machine learning, are normally excluded from this system type.
